

## Custom LED Cup Holder Light Kit

Thanks for purchasing this Cup Holder Illumination Install Kit! If you have any questions or feedback please email us direct at [info@AccentGlowLED.com](mailto:info@AccentGlowLED.com)

*Read these instructions completely before beginning installation*

*AccentGlowLED,LLC. does not assume responsibility and disclaims liability for damage, loss, or expense arising from improper use, operation, or installation of this product.*

### To adhere:

- Thoroughly clean inside each cup holder with an alcohol pad or Windex (this step is important for quality of adherent).
- Carefully drill a hole with a 3/16" (or larger) drill bit slightly off center in each cup holder.
- Run your wires through the holes starting at the top and remove the covering from the double-sided tape on the back of each cup holder disc. Without fully pressing down, carefully center each disc and then press down firmly to secure each disc (do not remove disc once firmly pushed down).

### Wiring:

- The RED wires need to go to a (+) positive 12VDC wire in the vehicle. DISCLAIMER: A 1-3amp fuse is suggested in line with the red LED wires.
- The BLACK wires need to go to a ground point in the vehicle or a (-) negative/ground wire in the vehicle.

### Wired to switch (optional):

It is optional to wire the LEDs to an external switch. Use a two-way, 2-wire switch.
